

Dr. Aamir Farooq

PhD — AI Automation Engineer

CONTACT

- Rawalpindi, Pakistan
- aamirfmalik@gmail.com
- linkedin.com/in/dr-aamir-farooq-7a2a1515
- github.com/amir-meridux/portfolio

CORE SKILLS

n8n & Workflow Automation
LLM Integration (OpenAI, Claude, Gemini)
Prompt Engineering
JavaScript & Python
REST APIs & Webhooks
Solution / Systems Architecture
Error Handling & Retry Logic
Audit Logging & Monitoring
Duplicate / Concurrency Prevention

EDUCATION

PhD, Microelectronics
Universiti Teknologi PETRONAS,
Malaysia

MPhil, Microelectronics
University of the Punjab, Pakistan

CERTIFICATION

AI For Everyone — DeepLearning.AI

CAREER TIMELINE

- 2024 – Present**
Founder & AI Automation Engineer
Meridux
- 2023 – Present**
Freelance Technical Consultant
Independent
- 2014 – 2018**
Postdoctoral Researcher
Universiti Teknologi PETRONAS
- 2009 – 2014**
PhD Researcher
Universiti Teknologi PETRONAS

PROFESSIONAL SUMMARY

AI Automation Engineer with 15+ years of engineering experience, including doctoral and postdoctoral research, applied to designing reliable, production-grade automation systems. Specialises in building AI-integrated workflow platforms that combine API orchestration, business logic, and LLM-assisted decision support into maintainable, auditable operational systems. Founder of Meridux, shipping end-to-end automation platforms from concept through production reporting, with structured error handling, concurrency control, and GDPR-aware data handling.

PROFESSIONAL EXPERIENCE

Founder & AI Automation Engineer / Systems Architect

Meridux | January 2024 – Present

- Architected production-grade workflow automation platforms using n8n, REST APIs, JavaScript, Python, and AI technologies (OpenAI, Claude, Gemini).
- Designed modular, AI-assisted workflow architectures that improve maintainability, scalability, and operational reliability.
- Engineered structured error handling, retry mechanisms, operational monitoring, audit logging, and workflow governance for production systems.
- Built an AI-powered patient intake automation platform (Meridux PatientCore) with intelligent routing, duplicate/concurrency prevention, automated communications, and operational reporting.
- Automated complete operational workflows from enquiry through executive reporting, eliminating duplicate execution via engineered concurrency controls.

Freelance Technical Consultant | April 2023 – Present

- Delivered technical consulting, workflow analysis, solution design, and technical documentation for academic and commercial clients.

SELECTED PROJECTS

Meridux PatientCore — AI-Powered Patient Workflow Automation

n8n, JavaScript, REST APIs, Google Workspace, Gmail API, OpenAI

- Transforms patient enquiries into structured operational workflows through intelligent routing, duplicate prevention, orchestration, automated communications, and reporting.

Prospect Intelligence Engine — AI-Powered Business Discovery Platform

n8n, Google Places API, JavaScript, REST APIs, Google Sheets

- Modular platform supporting business discovery, website intelligence, API quota management, contact enrichment, and scalable prospect processing.

RESEARCH ACHIEVEMENTS

- Published multiple peer-reviewed research papers in microelectronics and sensing technologies.
- Inventor on a patented sensing technology developed during postgraduate research.
- Four years of postdoctoral research in industrial sensing systems (wireless sensing, PETRONAS collaboration).
